# The 8 most important human skills to face any technological disruption

Rooted in the recommendations of the **World Economic Forum** in their Future of Jobs reports of 2020 and 2023.

## Analytical Thinking & Innovation

I analyze complex information and use logic and alternative thinking to develop new ideas and solutions to work-related challenges.

## Complex Problem Solving

I identify complex problems and review related information to develop and evaluate options and implement solutions.

## Resilience, Flexibility and Agility

I display maturity, poise, flexibility, and restraint to cope with pressure, stress, criticism, setbacks, and personal and work-related problems.

## Creative Thinking

I'm capable of bringing new ideas and concepts to existence and to imagine something that does not exist.

## Curiosity and Lifelong Learning

I understand the implications of new information for both current and future problem-solving and decision-making.

## Critical Thinking

I use logic and reasoning to identify the strengths and weaknesses of alternative solutions, conclusions or approaches to problems.

## Leadership and Social Influence

I have an impact on others in the organization, and display energy and leadership. Leadership can be possessed by anyone, regardless of their role within an organization.

## Reasoning and Ideation

I can influence the application and manipulation of information in problem solving.
